Artur Olszczyński
Senior .NET Developer
MakoLab

Artur is an experienced IT specialist who focuses on creating software shaped to users' needs. His particular field of expertise is the automotive sector. He has been with MakoLab for thirteen years and, for more than a decade now, he has been working on projects grounded in .NET and C# technologies and encompassing not only web applications, but also microservices.

A graduate of the Faculty of Technical Physics, Information Technology and Applied Mathematics at Łódź University of Technology and the University of Southern Denmark (SDU), Artur combines his practical work as a programmer with his love of sharing knowledge as an HEI lecturer, teaching on the FinTech course at the University of Łódź, among others. In his private life, he is an ardent devotee of football.
