Maciej Stanisławski

Head of AI Team
MakoLab

An experienced IT practitioner and leader, Maciej Stanisławski has spent years managing teams of engineers and scientists delivering innovative solutions at the intersection of cutting-edge technology and business. His expertise spans software engineering, cybersecurity and IT project management and he currently heads the AI Team at MakoLab, where he specialises in AI-powered and research-driven product development. Maciej is a graduate of the University of Łódź and the Polish-Japanese Academy of Information Technology.

He holds numerous programming, cybersecurity and project management certificates and is passionate about computers, literature and sharing knowledge.
